Is this a "Fast & Focused" Search Request? (Circle One) YES NO

A "Fast & Focused" Search is completed in 2-3 hours (maximum). The search must be on a very specific topic and meet certain criteria. The criteria are posted in EIC3600 and on the EIC3600 NPL Web Page at <http://ptoweb/patents/stic/stic-3600.htm>.

What is the topic, novelty, motivation, utility, or other specific details defining the desired focus of this search? Please include the concepts, synonyms, keywords, acronyms, definitions, strategies, and anything else that helps to describe the topic. Please attach a copy of the abstract, background, brief summary, pertinent claims and any citations of relevant art you have found.

Looking for:

Online Business Directory website that allows the business to choose options & customize its listing and order the listing all online with no need for offline contact. Include the website having functionality to calculate price quotation for the listing & display it to business/purchaser for ordering the listing on the fly. See Claim 18.

Voluntary Results Feedback Form

➤ *I am an examiner in Workgroup:* Example: 3620 (optional)

➤ *Relevant prior art found, search results used as follows:*

- 102 rejection
- 103 rejection
- Cited as being of interest.
- Helped examiner better understand the invention.
- Helped examiner better understand the state of the art in their technology.

Types of relevant prior art found:

- Foreign Patent(s)
- Non-Patent Literature
(journal articles, conference proceedings, new product announcements etc.)

➤ *Relevant prior art not found:*

- Results verified the lack of relevant prior art (helped determine patentability).
- Results were not useful in determining patentability or understanding the invention.

RECORD TYPE: Directory

CONTACT: Sales Department

SubmitWolf 6.0 from Trellian is a tool for Webmasters and site owners that enables them to promote their Web site in order to gain an advantage over their competitors. It is aimed at providing that advantage by increasing site traffic. It is an easy-to-use, professional Web site promotional tool that automates the process of promoting Web pages on the Internet. It contains a database of search engines, link lists, and **business directories**. SubmitWolf can automatically register users' **Web site** details with over 1,000 of these sites, serving to achieve optimal exposure and dramatically increase the number of Web site visitors. Users simply enter their Web site details, select the search engines where they would like to be listed, and SubmitWolf automatically visits each of the selected sites, then completes and submits their Web site information for listing. It comes with free, downloadable script upgrades and notifies users when an upgrade is available. SubmitWolf's metatag generator assists users to create metatags and export them into existing Web pages. Metatags help ensure that sites are listed in the right categories through search engines and assist potential site visitors to find the site.

GRADE: Product Analysis, No Rating

OneSource's UK Business Browser, Primark's Datastream Insite, Dialog's U.K. Company FactFinder, Dun & Bradstreet's D&B Marketplace Business Elite, and Reed Business Information's Kompass Register UK are highlighted in a discussion of databases with which users can locate United Kingdom company information. The primary and secondary sources of United Kingdom company data are explored, including the best free Web sites and various subscription sources. The U.K. classifies businesses either as sole traders, partnerships, or companies. Sole traders have one owner, while partnerships have multiple owners and shared liability. Companies are either Private Limited or Public Limited, and both have disclosure requirements. Differences occur among forms that must be filed and when they are due, based on legal type and size of company. Categories of resources described are company financial products, best free company financial World Wide Web sites, company directory sources, and best free company directory sites. Also discussed are search engines, most of which have United Kingdom versions that ostensibly provide more relevant results for users in the U.K. Dialog's UK Company Factfinder provides two CDs, one for analyzed financials with as much as 10 years of financial data and credit information, and another with full-text annual reports.

Treatment: General, Review (G)

Abstract: The MAGIC gels described by Fong et al. (*ibid.*, vol. 46, p. 3105-13, 2001) supposedly work in full atmosphere. M.J. Maryanski says that, if true, this would be a remarkable breakthrough in polymer gel dosimetry, which so far has required careful removal of molecular oxygen that is well known to inhibit free-radical chain polymerization. The curiosity of the M.J. Maryanski was amplified by his own previous studies of various candidate oxygen scavengers that could potentially be useful for making polymer gel dosimeters. Therefore, having read the article of Fong et al., he has experimentally checked the authors' assumption about full oxygenation, and found it to be false. In reply Fong et al. say that they have been pleased by the high level of interest shown in their recent paper. Professor Maryanski raises some interesting points, and Fong et al. understand his concern as a commercial vendor to safeguard the identity of BANG gels. To this end they searched the MGS Research Inc. website (www.connix.com/~mgsinc) and company advertisements and literature, as well as sundry journal publications, but have been unable to find a precise description of the contents of BANG3, much less a revelation that they incorporate the same components as the gels described in their paper. Furthermore, Fong et al. have found the use of the acronym BANG to be somewhat confusing. (12 Refs)

f2 abandons realestate.com talks
AUSTRALIA: REALESTATE, F2'S TIE UP PLAN DROPPED

The Australian Financial Review (AFR) 10 Oct 2000 p.43
Language: ENGLISH

The proposed tie up plan between Internet-based **business directory** provider f2 and <property website> realestate.com has been dropped, without any specific reasons given for the cause. According to Nigel Dews, chief of realestate.com, the negotiations between two sides has been dragging on for about one year and a half without any conclusion in sight.

First Malaysian 3-in-1 business directory
MALAYSIA: OCTAVE IN BUSINESS DIRECTORY PLAN
Business Times Malaysia (XAR) 10 Oct 2000 p.24
Language: ENGLISH

Malaysian information technology <IT> firm, Octave Allianz Sdn Bhd (Allianz), is planning to launch a three-in-one business directory in Malaysia to value-add its existing Malaysia e-Pages service. Lauded as the first in Malaysia, the said **business directory** will compose of a **website listing**, an interactive CD-ROM and a publication. Octave also plans to connect advertisers to its portal, www.e-pages.com.my for a reasonable charge.

Les entreprises franXaises vont investir/
FRANCE: INTERNET BUSINESS PROJECTS ON THE RISE
Les Echos (LE) 22 Jun 1998 p.14
Language: FRENCH

Among the solutions implementing the Internet technologies, production and logistics (15% of the total number of projects reported by a survey by the Mark*ess International cabinet), and human resources organization (14%) should report the strongest progression in the near future, the survey expects. Communication (creation of a **Web site**, a **business directory**, etc.) is the main application today with 37% of the total number of projects implementing the Internet, the survey says, followed by marketing and sales with 22%. In 1997, the Internet-based projects totalled an expected FFr 13bn in turnover in France and this is expected to more than double to FFr 27bn in 1998 and surge to FFr 77bn in the year 2000. The survey, based on a 40-company panel, shows that bank and distribution are the leading sectors in the implementation of such projects. Each project has a budget of FFr 800,000 on average with services supplied by other companies (software and computer engineering company, software publishers and, more and more, electronic Value Added Providers -e-VAPs) accounting for FFr 374,000, the survey adds.

TITLE: Where Does That Electronic Resource Fit on the Library Web Page?
AUTHOR: Digby, Todd R
SOURCE: Computers in Libraries, v24 n1 p6(4) Jan 2004
ISSN: 1041-7915
HOMEPAGE: <http://www.infotoday.com>

RECORD TYPE: Review
REVIEW TYPE: Product Analysis
GRADE: Product Analysis, No Rating

Because newer, full-text, cross-linked multimedia resources do not fit the conventional categories that librarians have assigned them, innovation in the way those resources are offered to users is in order. For instance, an online biographical database and index (which includes a short biographical description) also includes direct links to an encyclopedia entry on and a link to a journal article database describing the individual. The conventional categorization puts a biographical index in the reference section, but that location does not adequately reflect all resources available. Other examples of electronic resources that do not fit well into current categories include an electronic business directory, e-books and other full-text multimedia, and archival, digital collections. Many electronic resources are probably under-used because patrons are unaware of their existence; Web users are unlikely to spend hours searching the Web for all possible resources. Some suggestions, as well as descriptions of measures taken in the University of Wisconsin's library, are provided. One method of categorization is by type of resource, including books, journal articles, possibly e-books, and several others. Another is presentation of materials based on the general subject into which a resource fits. To address limitations of these methods, the two should be combined. Topics covered include modification of Web pages' structure to increase awareness of the types of electronic resources available, and the importance of not altering existing database and index resources while adding new resources.

Abstract: It is difficult to accurately assess the overall global market for SME-related e-commerce. However, we do know that Australia has more than 1 million SMEs; they are vitally important to Australia's economic prosperity. Thus, in September 2001 the government announced a \$6.5 million initiative to accelerate SMEs' adoption of e-commerce to facilitate online access to government purchasing within two years. Helping these SMEs efficiently build their e-commerce systems has become a high priority of Australia's government and IT/IS researchers. To find solutions to Australian SMEs' e-commerce concerns, we conducted research using Citysearch, an online business directory, in early 2002. We selected 10 cities/areas to research: Adelaide, Brisbane, Cairns, Canberra, Gold Coast, Melbourne, Perth, Sydney, Tasmania, and Townsville, and studied industry sectors that include many SMEs.

VoiceGate's Voice Wizard (TM), which incorporates features from the VIP4000 software package, offers small business offices a wide range of voice message processing options. The product integrates with Avaya, Toshiba, Samsung, Vodavi, Panasonic, Samsung, Fujitsu, and other telephone systems. It offers automated attendant, voice mail report, broadcast message, bulletin board, call screening, and departmental greeting features. The system also can queue calls by extension. Voice Wizard includes company directory, fax detection, pager notification, private message, and remote access and administration features. The system lets users record selected or all conversations. It also generates daily and monthly reports. Voice Wizard offers companies 15 holiday greeting options. It also includes multilingual prompt, customized call forwarding, and time and date stamping features.

GRADE: Product Analysis, No Rating

Web services take an evolutionary step beyond application service providers (ASPs), providing interoperability and **customization features** to users. While Web services and ASPs both provide access to applications, Web services provide mix-and-match features, with a focus on small components. For example, tapping a Web service, users might take a shopping cart component from one vendor and apply it to a credit card verification component of another vendor. Most ASPs, on the other hand, host enterprise resource planning, customer relationship management, and other large, integrated applications. To provide cross-platform integration features, most Web services will use Java 2 Enterprise Edition (J2EE). However, Microsoft, gearing up for its Microsoft .NET Web services release in 2002, is not supporting future versions of Java. Hopefully, proposed data standards for XML, Simple Object Access Protocol (SOAP), and Universal Description, Discovery and Integration (UDDI) will allow for data interchange between applications and services. UDDI provides **company directory** information, streamlining integration functions between businesses. Analysts predict that Web services will drive such marketplace vendors as Ariba and Commerce One to offer value-added features to their services.

Abstract: A geographic information system (GIS) is a new and powerful visualization and analysis tool for business and industry. The information contained within a GIS is generally extracted from pre-formatted third-party and in-house data files. The paper focuses on the attribute information available from online databases (such as D&B-Dun's **Electronic Business Directory**) and its potential use in developing GIS applications for business. Particular attention is paid to system commands such as RANK on DIALOG, which make possible the creation of **customized** geographical data sets. In **addition**, the paper discusses the procedures involved in importing online data into such popular GIS packages as Atlas GIS, MapInfo, and Tactician. (4 Refs)

Detailed Description

Claims

Detailed Description

... offer the product or services they desire. Buyers often look to

information sources, such as company directories, 15 personal references, and local media to compile a listing of possible vendors. For selection and price quotation system 103 preferably performs a prescribed operation to select products or **generate quotes** based on information the buyer provides through, for example, an information capture form 104.

The...also be able to select any of the products for the purpose of making an **on - line purchase** of the product. This will include the ability to pay for the product through an...the sellers' goods and services. The system could also include additional efficiencies in areas of **on - line purchasing** of goods and services, automated application generation, and links to calendar applications for the purpose...

Claim

... make product recommendations, formulate one-to-one sales strategies, generate customer specific marketing content, or **generate** price estimates/ **quotations** .

9 The method of claim 5, wherein the buyer is notified of vendors meeting the...

...to generate the list of qualified vendors.

19 The system of claim 18, wherein the **quotation** engine further **generates** custom reports for each qualified vendor, including at least one of a price, personalized marketing...
